

MICROBAND APPLICATOR KIT TO FIT REEKIE STONE & CLOD SEPARATOR MODEL 500 & 4000 / 5000 Series

These kits have been designed to allow chemical microgranules to be applied and incorporated at the time of stone and clod seed bed preparation .

The chemical is broadcast via fishtail spreaders across the riddle bed width , fed from Microband 35 litre two outlet rectangular hopper units , which are driven by a spoked landwheel ,with a variable chain and sprocket drive to alter chemical application rates.

A complete kit is supplied and ordered as follows in two parts :-

1/ Part No. 640207 Microband mounting bracket s, delivery equipment and landwheel drive kit , to fit Reekie Stone & Clod separator Model 500 & 4000 / 5000 Series .

The above kits consists of all mo unting brackets and fasteners , fishtail spreaders , delivery tubes and landwheel drive assembly complete with hydraulic landwheel lift and a variable drive to change application rates.

2/ Microband 35 Litre 2- outlet Hopper Units x 3- off.

* The type required are to be stipulated by the customer , with regard to which type of metering rotor is required to apply a particular chemical / application rate . This information is supplied by the chemical manufacturer / distributor.

*** If the type of rotor is not stipulated at the time of ordering supply the following :-**

760017 Microband 35 Litre 2-outlet rectangular hopper unit fitted with 2 x 5mm rotors per outlet.
